VinChip Systems Licences USB Device Controller IP to Biforst

San Jose, California, August 25th, 2004 :- VinChip Systems, a leading provider of the USB IP cores announced licensing to Biforst Technologies Inc., of its USB Device Controller.

“We are happy to add Biforst to our growing list of Product licensees” said Chezi Ganesan, President of VinChip Systems. “We look forward to working with Biforst and others to further drive VinChip-based solutions into an increasing number of markets and applications” Chezi Ganesan added. Biforst will use VinChip’s USB solution in its next generation Audio products.

“Biforst are very glad to have chance to incorporate with VinChip” said K.C. Chiang, General Manager of Biforst Tech.

About VinChip Systems

VinChip Systems was founded to fill the design productivity gap brought about by advances in semiconductor manufacturing and reducing product life cycles. VinChip's current focus is on developing IP's for USB, PCI express along with associated software stacks and in providing design services. It is developing solutions for Computing, Networking, Consumer electronics, Embedded systems, Avionics and Industrial Systems. VinChip offers substantial cost savings to its customers by providing proven IP's and design services on-site, or at its design centers located in San Jose and India.
